GraphQL, Node.js (Express, Nest)

#### Tools

Git, GitHub / GitLab, Jira, Claude Code

### LANGUAGES

Polish (native)

English (C1)

### ABOUT ME

Frontend Engineer with a passion for modern Web Platform APIs and JavaScript frameworks. As a former competitive athlete, I bring the same discipline and drive to my work, always looking for ways to improve and push boundaries.

### EXPERIENCE

#### Senior Frontend Engineer

Sep 2025 - Present

Ingenious IO, Nashville (Remote)

- Actively developing a fast-growing construction project management application within an **international team** for a **US-based startup**.
- Optimized** existing solutions by accelerating critical functionalities in the most profitable module by **30x up to 2000x** in extreme cases.
- Improved** the implementation of global UI components, having a measurable impact on **system architecture**, code quality, and development team efficiency.
- Worked closely with the **system architect**, leading initiatives focused on improving code quality, scalability, and long-term stability of the platform.
- Leveraged modern **AI tools** to significantly increase personal productivity and maximize the value delivered to end users and clients.
- Peer recognition:** "You've built a very robust drag-and-drop feature for the budget, which was quite a challenge. Congratulations, amazing to have you on the team." — **Frontend Architect**

#### Frontend Engineering Team Lead

Aug 2022 - Sep 2025

Redge Technologies, Warsaw (Remote)

- Developed and maintained** **TVP VOD**, a streaming platform serving **over 2.8 million users**, ensuring performance, stability, and scalability.
- Implemented user analytics tracking** solutions using **Google Tag Manager, Gemius, and Synerise**, enabling data-driven

I consent to the processing of my data to conduct present and future recruitment processes, by applicable laws, in particular by the Regulation of the European Parliament and of the Council (EU) 2016/679 of April 27, 2016. ("GDPR").

## HOBBIES

- Bodybuilding
- Boxing
- Basketball
- Gaming

insights and improving user engagement strategies.

- **Spearheaded a major web performance overhaul**, eliminating anti-pattern solutions, optimizing code splitting, and reducing the **main script size by 22.5%**, leading to an **average 100ms improvement in load time**.
- **Proposed and led the migration** of the Web App codebase from **Vue 2 to Vue 3**, improving performance, maintainability, and developer efficiency.
- **Advocated for and led automated testing adoption**, improving CI/CD pipelines, **preventing regressions and enhancing code quality**.
- **Contributed to the mobile client application using React Native**, improving UX and feature delivery for mobile users.
- **Collaborated with stakeholders** to break down epics, give workload estimations, guide project timelines, and deliver strategic technical insights.

## Software Developer

Nov 2019 – Aug 2022

Notus Finance, Wrocław

- **Built and improved** the 4Notus application with **React**, streamlining the mortgage sales processes.
- **Enhanced the company's CRM system** using **Vue.js** and **Bootstrap**, **reducing technical debt**, improving UI and overall UX, leading to better customer management and team productivity.

## Other

- **Developed a Next.js website** for an award-winning social rights campaign under a very tight deadline, as a passion-driven non-profit project, showcasing promotional videos, an audiobook, and articles.
- **Built a web app** for respite care to help coordinate efforts with local community members, focusing on improving communication and logistics.
- **Freelance** website development and maintenance.

## EDUCATION

### Bachelor's Degree in Computer Science

2019 – 2023

School of Computer Science and Management "Copernicus",  
Wrocław

### Technical Physics (1 year) – Discontinued

2018 – 2019

University of Science and Technology, Wrocław
